

## An instruction for the authors

Masato Wakayama

Faculty of Mathematics Kyushu University, Japan

We are planning to make an extended abstract book for Forum Math-for-Industry "Information security, visualization, and inverse problems, on the basis of optimization techniques(FMI2010)" and "Study Group Workshop(SGW)". Please prepare for the abstract of your talk due to the form of this sample TeX file and send the PDF file (better with your TeX source file too) to

`fmi2010@math.kyushu-u.ac.jp`

until **20th September, 2010**. The length of your abstract should be between 2 and 10 pages. You will receive the abstract book in the conference venue.

Thank you for your great contribution for this Forum. We are looking forward to seeing you at the Forum, FMI2010 and SGW.
